

# Are zoos okay?

Opinion 1: Zoos are okay so long as they are in the animals' interests.

'Animals aren't like humans. Humans might really want to be free, but animals don't want that.

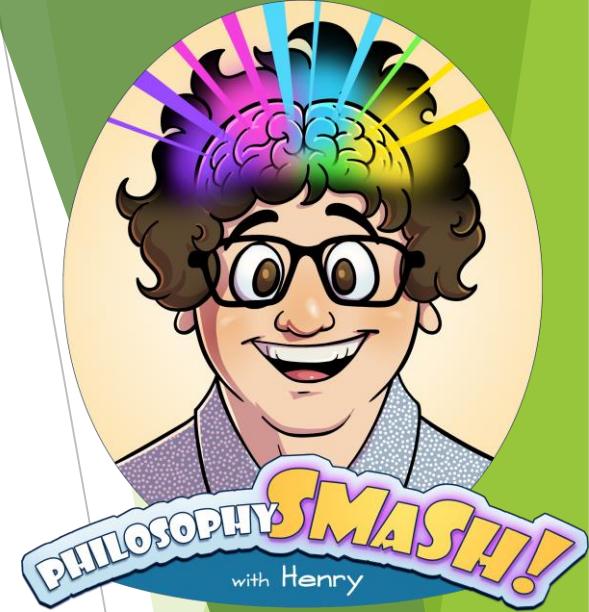

Zoos are okay so long as they animals well fed and give them a fun environment to play in.

That's in the best interests of the animal.'

## Opinion 2: Zoos are wrong!

'Zoos are not okay, we shouldn't cage animals against their will. What right do we have to take away their freedom, just for our entertainment?'

A thought: how do we know what is in an animal's interests?

Animals can't tell us what they do and don't prefer. So how can we know what is in their interests?

## What do you think?
