This activity should be used with the 'Could a rock be conscious?' video, available at the website above.

### ***What has a mind?***

Look at the list of things in the box below. For each thing, think about whether you think it has a mind: whether it might have thoughts, feelings, and beliefs of its own. For each one, explain why you think it does (or does not) have a mind.

Try to apply what you've learned from the video and the handout.

#### ***What has a mind?***

- 1) You.
- 2) A new-born baby.
- 3) A dog.
- 4) A tree.
- 5) An octopus.
- 6) A bee.
- 7) A bee hive.
- 8) A rock.
- 9) The universe.
